Temporary cookies, as well as "session cookies" or "transient cookies", are cookies that are deleted after a user leaves an online offering and closes their browser. § 8 Integration of Vimeo videos

(1) We use Vimeo to integrate videos from the provider, which are stored on <http://www.vimeo.com> and can be played directly from our website. These are all integrated and embedded in the "Extended Privacy Mode", i.e. no data about you as a user are transferred to Vimeo if you do not play the videos. Only when you play the videos will the data referred to in para. 2 be transmitted. We have no influence on this data transfer.

(2) When you visit this website, Vimeo is notified that you have accessed the corresponding sub-page of our website. Furthermore, the data mentioned under § 3 of this declaration will be transmitted. This takes place, regardless of whether Vimeo makes a user account available, via which you are logged in, or whether no user account exists. Vimeo stores your data as usage profiles and uses it for the purposes of advertising, market research and/or requirements-oriented design of its website. Such evaluation also takes place (even for users who are not logged in) for the purposes of providing customised advertising and to inform us about activities on our website. You have the right to object to the creation of these user profiles, whereby you must contact Vimeo to exercise this right.

(3) For more information on the purpose and scope of data collection and processing by Vimeo, please refer to the Privacy Policy. § 9 Use of Plausible Analytics

(1) Since data protection is important to us, we refrain from using invasive web tracking tools such as Google Analytics. Plausible Analytics takes a particularly privacy-friendly approach to analysing your visit.

(2) We use Plausible Analytics to continuously optimise our offer both technically and in terms of content, in particular to understand and improve the use of our website by users. Plausible Analytics does not set any cookies and does not store any information in the browser.

(3) Below you will find more information about Plausible Analytics and the privacy policy of this tool. Service provider: Plausible Insights OÜ, Västriku tn 2, 50403, Tartu, Estonia; website: <https://plausible.io/>, privacy policy: <https://plausible.io/privacy>

(4) You are not tracked across devices and websites with this, unlike many other analytics tools. Also, all data collected per day is isolated and accumulated. Plausible Analytics collects the following information, among others, for this purpose:

- Date and time of your visit
- title and URL of the pages visited
- incoming links
- the country you are in
- the user agent of your browser software

Plausible Analytics does not use or store cookies on your terminal device. All data is stored completely anonymized in the form of a so-called hash. A hash is an encryption of data that is not

reversible, i.e. cannot be decrypted. In this way, we can analyse your visit without storing personal data that would be readable by us, Plausible Analytics or third parties.

§ 10 Use of Google Fonts

(1) On our website we use Google Fonts. These are the “Google Fonts” of the company Google Inc. For the European area, the company Google Ireland Limited (Gordon House, Barrow Street Dublin 4, Ireland) is responsible for all Google services.

(2) No cookies are stored in your browser. The files are requested via Google domains `fonts.googleapis.com` and `fonts.gstatic.com`. According to Google, the requests for CSS and fonts are completely separate from all other Google services. If you have a Google account, you do not need to worry that your Google account data, while using Google Fonts will be transmitted to Google. The data is only stored locally on our servers, so that a data transfer to third countries is excluded.

(3) Google Fonts is an important component to ensure the quality of our website. All Google Fonts are automatically optimised for the web. This saves data volume and is a great advantage especially for use on mobile devices. When you visit our site, the low file size ensures a fast loading time. Furthermore, Google Fonts are secure web fonts. Different image synthesis systems (rendering) in different browsers, operating systems and mobile devices can lead to errors. Such errors can sometimes visually distort texts or entire web pages. Thanks to the fast Content Delivery Network (CDN), there are no cross-platform problems with Google Fonts.

Google Fonts supports all major browsers (Google Chrome, Mozilla Firefox, Apple Safari, Opera) and works reliably on most modern mobile operating systems, including Android 2.2+ and iOS 4.2+ (iPhone, iPad, iPod). We therefore use Google Fonts so that we can present our entire online service as uniformly as possible.

(4) Your data is not transmitted to external Google servers. If you have consented to Google Fonts being used, the legal basis for the corresponding data processing is this consent.

§ 11 Use of Hotjar

We use Hotjar to better understand the needs of our users and to optimise the offerings and experience on this website. Using Hotjar's technology, we get a better understanding of our users' experiences (e.g. how much time users spend on which pages, which links they click, what they like and what they do not, etc.) and that helps us to align our offer to our users' feedback. Hotjar uses cookies and other technologies to collect data about the behaviour of our users and their devices, in particular, the IP address of the device (recorded and stored in an anonymous form only during your use of the website), screen size, unique device identifiers, information about the device used browser, country, preferred language for displaying our website. Hotjar stores this information on our behalf in a pseudonymous user profile. Hotjar is contractually prohibited from selling the data collected on our behalf.

The legal basis for the use of Hotjar is your consent in accordance with Article 4 para. 11, Article sentence 6, para. 1, and Article 7, para. 1 of the Data Protection Act 2018, which you can provide via our cookie banner. You may revoke your consent to unencrypted email communication at any time by sending an email to jobs@simplesurance.de with effect for the future.

We collect and process the personal data of applicants for the purpose of facilitating the application process. Processing may also be carried out electronically. If we conclude an employment contract with an applicant, the data transmitted will be stored for the purpose of processing the employment relationship in compliance with the statutory provisions and transferred to HR. If we do not conclude an employment contract with the applicant, the application documents will be automatically deleted six months after notification of the rejection decision or the completion of the application process for this position, provided that the deletion does not conflict with any other legitimate interests on our part (e.g. statutory retention periods). The legal basis for this is Article Article 6, para. 1, subsection f), and Article 132, para. f) of the Data Protection Act 2018. If you have consented to your data being stored in the Talent Pool for a longer period of time, your data will be stored for a further 2 years.

Personal data that is made available to us as part of the online application process is stored and processed on Greenhouse's servers in the USA. The storage and processing take place on the basis of EU model contractual clauses, which also guarantee an adequate level of data protection. If necessary, we will process your data in order to process your application. We will not pass on your

application data to other companies or third parties for any other use of the data, except for processing your application.

Rights of the data subject

In accordance with the Data Protection Act 2018, you have the right to information, correction, deletion, restriction of processing and data transfer. If you want to assert your rights, you may contact our HR department directly at jobs@simplesurance.de.

§ 16 Data security

We use the most common TLS protocol (Transport Layer Security)/SSL (Secure Socket Layer) protocol together with the highest level of encryption supported by your browser. Usually, this is a 256-bit encryption. If your browser does not support 256-bit encryption, we use 128-bit v3 technology instead.

The transmission of a single page of our website in encrypted form is indicated on our website by the display of a closed key or lock icon in the bottom status bar of your browser.

We also use suitable technical and organisational security measures to protect your data against accidental or intentional manipulation, partial or complete loss, destruction or unauthorised access by third parties. Our security measures are continuously improved corresponding to technological developments.

§ 17 Deletion periods

Your personal data will be deleted, provided that statutory retention obligations do not preclude this, if you have made use of your right to have the data deleted, if the data is no longer required for the purpose for which it was saved, or if its storage is inadmissible for other legal reasons.

§ 17 Validity and changes to this Privacy Policy

This Privacy Policy is currently valid and is dated May 2023.
